PREFACE

The following list includes medications that are covered by BlueCross BlueShield of Tennessee plans with the Standard Control with Advanced Control Specialty Formulary, which is available through CVS Caremark®, an unaffiliated company that administers your pharmacy benefits on behalf of BlueCross BlueShield of Tennessee.

This isn't a complete list of covered medications, and inclusion on the list doesn't guarantee coverage.¹ You must have a valid prescription from a licensed health provider, and in some instances, prior authorization from BlueCross to receive coverage for these medications. Some medications may also be subject to other pharmacy management programs, such as step therapy or quantity limitations, or be considered specialty medications.

Special note for opioid containing products: The quantity of opioid product prescribed (including those that are combined with acetaminophen, aspirin, or ibuprofen) will be limited to up to 90 morphine milligram equivalents (MME) per day based on a 30 day supply. Members who are opioid-naïve will be required to use an immediate-release (IR) formulation before moving to an extended-release (ER) formulation and will be subject to quantity limit restrictions.
